**[P.T.O.]**

(2)

62212

10. Compare and contrast exploratory research design and conclusive research design in terms of purpose, method, and outcomes.
11. Write short notes on:
- Descriptive and inferential statistics.
  - Type I and Type II error in hypothesis testing.

### SECTION - C

12. **Compulsory Case Study:** (1×15=15)

Retail company, **StyleKart Fashions Pvt.Ltd.**, operates **25 apparel stores** across major cities in South India. The management wants to understand **customer buying behaviour and brand perception** to improve marketing strategies and product placement.

The company's research objectives are to:

- \* Identify the factors that influence customer's purchase decisions (e.g., price, quality, brand image, promotional offers)
- \* Compare customer preferences between **metro cities** and **tier-2 cities**.
- \* Examine how **age, gender, and income** affect fashion purchase patterns.

Since surveying all customers is not feasible, the marketing research team must select an appropriate **sampling method** and determine a representative **sample size**.

- Identify the **target population** and **sampling unit** for this study.
  - Suggest an appropriate **sampling method** (probability or non-probability) and justify your choice.
  - How would you decide the **sample size**, considering cost, time, and representativeness?
  - Explain the steps you would take to ensure **Reliability and validity** in this research.
-
