IV. Prepare 5 slides for the presentation on any One of the following. (1×5=5)

1. Effective Communication Skills.

(OR)

2. Rain Water Harvesting.

V. Read the following passage and answer the following questions : (5×1=5)

Excessive screen time has become a growing concern in today's digital age due to its negative impact on physical and mental health. Spending prolonged hours in front of screens__whether computers, smartphones, or televisions__can lead to eye strain, headaches, and poor posture, resulting in long-term vision problems and musculoskeletal issues. Furthermore, excessive screen use often reduces physical activity, contributing to obesity and related health problems like heart disease and diabetes. For children and adolescents, too much screen time may interfere with essential sleep patterns, affecting their growth and cognitive development. Besides physical health issues, excessive screen time also affects mental and social well-being. It can increase stress, anxiety, and feelings of loneliness by reducing face-to-face interactions and encouraging social isolation. Overexposure to digital media and social networks often leads to distraction, impaired concentration, and decreased productivity. In children, it may hinder social skills development and academic performance. Consequently, managing screen time is critical to maintaining a healthy balance in life, encouraging outdoor activities, personal interactions, and adequate rest.

Questions

1. What are some physical health problems associated with too much screen time?
2. How can excessive screen time affect sleep patterns, especially in children?
3. In what ways does screen overuse impact mental health and social relationships?
4. Why is managing screen time important for maintaining productivity and focus?
5. What lifestyle habits can help reduce the negative effects of prolonged screen use?

VI. Rearrange the jumbled sentences into a coherent paragraph. (1×5=5)

1. As a result, scientists have started exploring biodegradable alternatives.
2. Plastic pollution has become one of the most pressing environmental concerns.

(3)

AECEN33

3. These materials break down more easily and reduce the long-term impact on ecosystems.
4. One such alternative is the development of bioplastics derived from natural sources.
5. The accumulation of plastic waste in oceans and landfills poses severe threats to wildlife.

VII. Develop the story based on the hints given below.

(1×5=5)

The diamond--set gold ring vanishes one day--the king doubts the thief among the servants--the adverse situation calls for action--none of the servants admits to guilt--the King gives each servant a stick--he warns that one who has robbed would have his stick two inches taller--the thief is exposed.
