[P.T.O.]

SECTION - C

12. Compulsory Case Study :

(1×15=15)

Navigating Change at Infosys

Infosys, one of India's premier IT services companies, has long been recognized for its structured management practices and people - centric culture. In 2014, under the leadership of Vishal Sikka, Infosys underwent a major organizational transformation aimed at reviving its growth and adapting to the rapidly changing digital economy. The leadership transition brought significant changes in organizational design, decision - making processes, and the overall culture of innovation. Sikka emphasized **design thinking** and **automation**, encouraging employees to move from repetitive tasks to value - creating roles. As part of this shift, the company initiated training programs to enhance employee learning, focusing on **organizational learning and transformation**. However, this period also exposed challenges in **group dynamics** and **employee motivation**, especially among middle management, many of whom resisted the top- down changes. The leadership had to balance **Maslow's hierarchy of needs** and **Herzberg's motivators** to retain talent and boost morale. Additionally, the introduction of a **flat organizational structure** clashed with the existing hierarchical systems, creating confusion in reporting relationships. Despite these hurdles, Infosys managed to develop **self - managed teams** in key innovation centers, enhancing cross - functional collaboration. Leadership further promoted a **positive organizational culture** by fostering transparency and initiating platforms for **collaborative dialogue**. Eventually, by aligning strategic goals with employee aspirations, Infosys was able to evolve into a more agile, digitally - driven enterprise while navigating the complexities of **organizational change**.

Discussion Questions :

- a) What leadership style did Vishal Sikka demonstrate during Infosys' transformation, and how did it impact organizational behavior?
- b) How did the shift in organizational structure influence motivation and group dynamics within Infosys?
- c) What change management strategies can be applied to reduce resistance when introducing transformational initiatives?
